

1. There are 4 files:
  - a) Matrix-PC-tool.exe: executable file
  - b) config.ini: configuration file, do NOT change file name.
  - c) Language-English.ini: configuration file. Filename maybe changed to your favorite language, such as French.
  - d) Language-中文.ini: configuration file. Filename maybe changed to your favorite language, such as 繁体.
2. Change default language
  - Change filename of "Language-English.ini", "Language-中文.ini", replace "English", "中文" with your favorite language。

- Change default language:
    - config.ini, search "CurrentLanguage=English", replace "English"
3. Change UI string:
  - Language-English.ini, search "String\_AppName", replace "Matrix-PC-tool-Vx.x.xxx" with your favorite string.
  - For most of the string in UI, you may change to any string in any language.
